Protection

for Maximum Yield

Mulch Film

Techpoli Mulch Film is a scientifically designed Polyethylene (LDPE) film catered to enable controlled and improvised farming, produced using best quality raw material. We guarantee optimum quality in all the range of products offered by us. Mulches develop a microclimatic underside of the sheet, which contains high level of carbon di-oxide due to the high level of microbial activity.

Mulch Film's Key Features

Improves Soil Health

Early and improved Cropping

Optimizes Crop Quality

Organized Landscape

Why Chose Us

- Economical
- Environment Friendly
- 20 -100 Microns
- Smooth Surface Finish
- Ease of Planting

Product Details:

Material	LDPE Film
Dimension (Length)	365/400 Mtr
Thickness (Microns)	20/25/30/40/50/75/100
Width	800 mm,900mm,1000 mm,1200 mm
Colours	Black + Silver. (More colours available on request)
